PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3 years of experience designing, developing, and deploying scalable web applications in financial services. Proven expertise in building responsive frontends with React and robust backends using Node.js, Spring Boot, and Python. Strong proficiency in managing both relational (PostgreSQL, MySQL) and non-relational databases (MongoDB). Experienced with CI/CD pipelines, cloud platforms (AWS, GCP), testing frameworks (unit, integration, regression), and Agile methodologies. Adept at translating business requirements into efficient technical solutions while maintaining code quality, security, and scalability.

EDUCATION

SRM Institute of Science and Technology | Chennai, TN
B.Tech in Computer Science and Engineering with specialization in Cloud Computing | 2023
CGPA: 9.48 / 10
Relevant Coursework: Data Analysis, Software Engineering, Operating Systems, Algorithms, Artificial Intelligence

BSN Academy | Kota, RJ
12th - Senior School Certificate Examination | 2018 | Percentage: 76.4%

DAV Public School | Pandavpara, CG
10th - Secondary School Examination | 2016 | CGPA: 10 / 10

WORK EXPERIENCE

BARCLAYS | Pune, MH
Fullstack Software Engineer (BA 4) | Jul 2023 – Present

- Developed a comprehensive Appointment Booking System (ABS) with 30,000+ active monthly users, featuring intuitive booking interfaces and advisor scheduling tools across mobile and web platforms using React, TypeScript, and Spring Boot.
- Designed and maintained scalable PostgreSQL and Oracle databases with optimized queries and data modeling for high-concurrency environments, ensuring performance and reliability.
- Built responsive, accessible user interfaces using React, HTML5, CSS3, and Redux Toolkit, implementing best practices for clean code and reusability.
- Developed and maintained robust backend APIs and services using Typescript, Node.js, Express, and Nest.js, Spring Boot, Java, designing RESTful APIs, middleware, validation, error handling, authentication flows, and service integrations across multiple applications.
- Implemented automated testing frameworks including unit and integration tests, improving code quality and reducing production defects.
- Collaborated with product and design teams to translate business requirements into technical solutions, participating in code reviews and driving continuous improvement.
- Managed CI/CD pipelines and deployment processes across staging, UAT, and production environments using Git, ensuring seamless code integration and stability.
- Technologies: React.js, TypeScript, JavaScript, Redux Toolkit, HTML5, CSS3, Node.js, Express, Nest.js, Spring Boot, Java, PostgreSQL, Oracle DB, MongoDB, Git, AEM

BITCS | Noida, UP
Fullstack Software Developer Intern | Jan 2022 – Feb 2023

- Developed multiple full-stack applications for diverse client needs, including restaurant management systems and e-commerce mobile applications.
- Designed RESTful APIs and integrated third-party services to support seamless data flow across frontend and backend systems.
- Technologies: React.js, TypeScript, JavaScript, Next.js, Redux, Flutter, Dart, Java, Spring Boot, Python, Flask, Node.js, Express, Nest.js, Git, Terraform

PROJECTS

PARADISH – Restaurant Management System

- Designed and implemented a comprehensive restaurant management platform with order management, invoice generation, employee administration, and inventory tracking with role-based access control for secure user management and data isolation.
- Developed responsive frontend and robust backend APIs with PostgreSQL database for scalability.
- Technologies: Next.js, TypeScript, PostgreSQL, REST APIs
- GitHub: SirAtul1204/paradish-v3

SKILLS

Frontend: React.js (Advanced), Vue.js, TypeScript (Advanced), JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Next.js

Backend: Node.js (Advanced), Express.js, Nest.js, Python (Advanced), Flask, Spring Boot, Java, C#, Ruby (Basic)

Databases: PostgreSQL (Advanced), MySQL, MongoDB, Cassandra (Basic), Redis (Caching)

Cloud & DevOps: AWS (EC2, S3, Lambda), Google Cloud Platform (GCP), Terraform, Git, CI/CD Pipelines, Docker (Basic)

Testing & Code Quality: Unit Testing, Integration Testing, Regression Testing, JUnit, Vitest, Code Reviews, Clean Coding Practices

Additional: Data Structures & Algorithms, System Design (Scalability, Reliability, Data Optimization), Agile/Scrum, RESTful API Design
